

# ELIMINATOR BLADES

## Application:

- Removal of mist from an airstream
- Horizontal airflow
- High air flow rates (12,000 to 140,000 cfm)

## Features:

- Separator uses vertical eliminator blades
- Flanged inlet and outlet
- Integral sump and drain connection.

## Benefits:

- Compact design
- Uses intermittent cleaning water system for reduced water consumption
- Simple, reliable, and easy to maintain

## How it Works

- Air flows through passages between the blades
- Droplets are caught in extended lips at each corner
- The droplets flow downwards to the sump below
