

RECTANGULAR ABSORPTIVE SILENCER

Application:

- Absorptive-type sound attenuation
- Sizes ranging up to 95,000 cfm
- Operating pressure: up to 40 inWC

Features:

- Removable panels with handles at ends
- Bolted maintenance cover
- Flanged inlet and outlet connections
- Available in stainless steels or painted carbon steel

Benefits:

- Simple, reliable, and easy to maintain
- Heavy-duty construction

How it works:

- The removable panels hold sound attenuating media between perforated plates
- The air flows between the sound attenuating panels
- A removable maintenance cover allows access for inspection
